GUIDE INDICE COMMERCIAL

CANADIEN

2ème PARTIE

Commencant à la page 255, sur papier vert, se trouvent les noms et les adresses des manufacturiers.

3ème PARTIE

Commencant à la page 545, se trouve une liste alphabétique des articles fabriqués au Canada, donnant les noms de toutes les maisons qui les fabriquent.

Le mot principal en anglais est ordinairement placé le premier, suivi d'une phrase le modifiant, p.e.: Quincaillerie, de construction: Cuir, coupe de bottines et chaussures. Mais, quand l'inversion ne semble pas faisable le mot modifiant est placé le premier, et est ainsi arrangé dans la liste alphabétique, p.e.: Mécanisme de piano—Piano hammers; Shoe packs—Chaussures en cuir tanné à l'huile. En cas de doute on peut essayer les deux méthodes. Quand deux noms ou plus sont communément employés pour le même article, nous avons essayé de donner des explications vis-à-vis. Quand on désire l'adresse de la rue, voir la 2-ème Partie, commençant à la page 255. Les noms des fabricants qui font ou sont intéressés dans le commerce d'exportation sont indiqués par un astérisque★.

4ème PARTIE

Commencant à la page 1015, la Section Spéciale indique les noms des exportateurs principaux des produits de la ferme, etc. La traduction française se trouve au revers.

5ème PARTIE

À la page F-1 sur papier vert, la Section de Traduction Française commence. Les noms des articles donnés dans l'Indice Français sont suivis par leur équivalent en anglais, et l'équivalent anglais se trouve placé alphabétiquement dans la 3-ème Partie.

SERVING CANADA FOR OVER 60 YEARS

by manufacturing
equipment for the
generation and
transmission
of electric power

as well as a wide
range of products
that put it to work

At one time or another, almost everybody in Canada has been affected, either directly or indirectly, through some use of a G-E product—whether it's a giant generator or a simple fuse plug, an electric motor which runs an elevator or the electronic control that speeds the newspaper presses, a labor-saving appliance in the home or a two-way radio that summons a taxi.

Canadian General Electric is proud to have played a part, for sixty years, in the ever-growing electrical development of Canada. It is equally proud that the wide range of electrical equipment it produces, the household appliances and the many types of lamps for home and industry, are helping to make life easier and more enjoyable for all of us.

Buyers prefer PROTECTED products!

**It *pays* to
specify**

**CLOSURES
on every
drum order**

When your drums are equipped with Tri-Sure* Closures, your product is protected from leakage and losses—and your customers *know* they are getting *full drums, free from impurities*—because every gallon is guarded by a Flange that is integrally assembled with the drum-stock, a Plug that engages securely with the Flange, and a leak-proof tamper-proof Seal.

Give your product the protection it needs—and that your customers want—by specifying “Tri-Sure Closures” on every drum order.

The “Tri-Sure” Trademark is a mark of reliability backed by 30 years serving industry. It tells your customers that genuine Tri-Sure Flanges (inserted with genuine Tri-Sure dies), Plugs and Seals have been used.

WHY you can depend on STOKES . . .

BEST OF TOOLING ►

One big reason for STOKES leadership in custom molding and extruding lies in the perfection of their molds and dies. There is a large staff of top-flight designers, draftsmen and tool-makers at STOKES and they have won a reputation for flawless workmanship. In the picture at the right you see one of these highly-skilled tool-makers as he puts the finishing touches on a mold in the STOKES tool-shop which is one of the largest, most up-to-date and completely equipped in Canada.

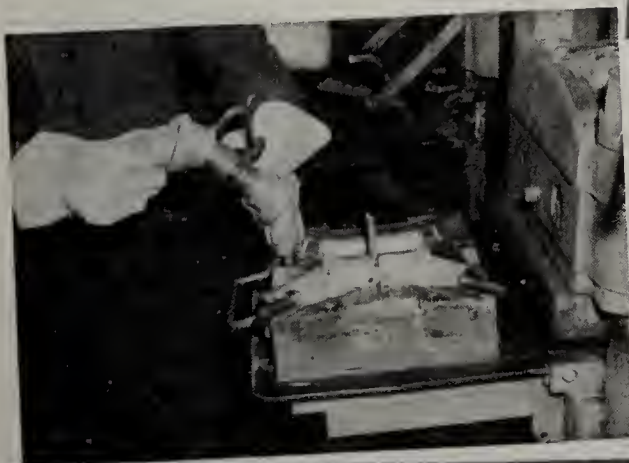

◀ RIGHT GRADE OF RUBBER

Scores of different rubber compounds developed in the STOKES laboratory meet the demand for molded and extruded hard and soft rubber parts such as grommets, washers, piston cups, gaskets, pipe and fittings, sheet rod, tubes, battery parts, handle grips, brush holders, diaphragms. STOKES will develop the compound best suited to your needs for resilience, strength, durability, matching colour. Shown at the left is the big 84-inch rubber mill at the STOKES plant. Operators are cutting slabs from a batch of butyl stock to be extruded into windshield or window weatherstrips for cars and trucks.

◀ EXPERT MOLDING SKILL

The operator in the picture at the left is removing from the mold a familiar type of soft rubber vacuum-cleaner brush adapter, made in a gray rubber compound specially developed by STOKES for this particular job. This is just one of hundreds of molded or extruded rubber and plastic parts now flowing in an endless stream from the STOKES plant to manufacturers of appliances, automobiles, furniture, sporting equipment, aircraft, ranging in size from tiny grommets to a 172-lb. soft rubber dummy used for parachute testing.

"Food is our business"

We mean the business of making sure your employees are getting well balanced, nourishing meals.

It is an established fact that well-fed employees work harder . . . they produce more . . . they are happier people . . . there is less absenteeism from work.

Our clients—industries, colleges, institutions, banks, etc.—are satisfied clients. With practically no effort on their part their employees are fed good wholesome food every working day. We provide and cook the food. In many cases we designed the kitchens. We provide the fully-trained kitchen staffs. Every menu is supervised by a qualified dietitian. Every cost or expense is itemized.

We can do the same for you. In our brochure, "FOOD IS OUR BUSINESS" you'll find out about our methods of operation, and our various types of operation. You'll see how economical an employee feeding operation can be. Write today for your copy.

THE FASTEST THING IN FASTENINGS

SPEED NUTS are speeding up assembly lines all across Canada — and are improving product quality as well. Because SPEED NUTS are engineered for their job it is little wonder that over 5,000 variations have been developed so far — with still newer ones being introduced at the rate of four a day. The aircraft, automobile, stove, refrigerator, and washing machine industries, to name but a few, know the value of SPEED NUTS, for they are all quantity buyers. If your production involves fastening, then it's a pretty safe bet that SPEED NUTS can speed things up for you.

Most of the difficulties associated with finned tubing are traceable to the mechanical or solder bond between tube and fins. With UNIFIN this source of difficulty is completely eliminated—because the fins are extruded from the actual metal of the tube wall—a feature unique to UNIFIN!

Only UNIFIN offers you these advantages—

- Uninterrupted heat flow from tube to fins.
- Uniform heat flux along the whole fin length, due to tapered fin section.
- Complete resistance to the effects of vibration.
- Ability to be formed into any practical shape without damage.

UNIFIN tubing is available in a wide range of tube diameters, fin spacings, fin heights, and wall thicknesses. For full information write to our Dept. "T"—and if you would like to examine the unique construction of Unifin, a sample will be gladly sent on request.

Unifin Duoflex two-row blast coil with end casing removed to show construction, is shown on the right. Write to our Dept. "T" for Bulletin No. 300 giving details of other complete heat transfer units, available through established fan companies.

Installations like

Sunbeam Stewart
furnaces are helping
manufacturers reduce
cost and keep
themselves competitive

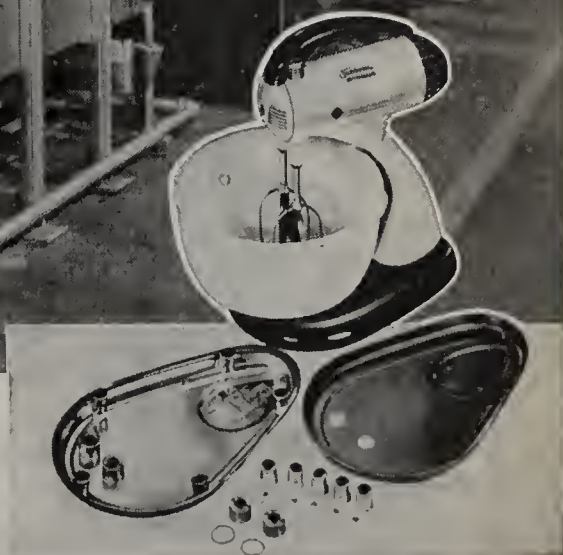

**COPPER BRAZING . . . SILVER SOLDERING . .
BRIGHT ANNEALING . . . ALL-IN-ONE UNIT**

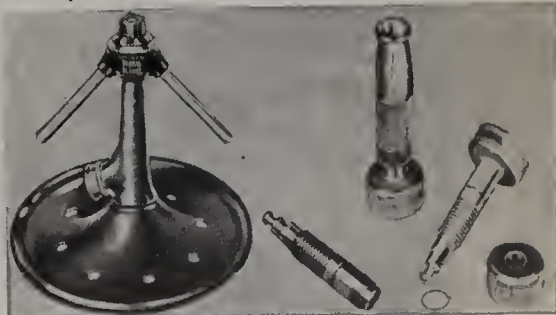

A variety of Sunbeam products are copper brazed, silver soldered and bright annealed in this versatile Sunbeam Stewart Continuous Electric Brazing unit. Result: Increased production, lower operating cost and improved quality.

As a division of Sunbeam Corporation, Sunbeam Stewart has the practical advantages of designing furnaces used in the parent plant—working closely with its heat treating problems.

Modern brazing furnaces as built by Sunbeam Stewart enable product designers to employ simplified, practical designs in the production of brazed assemblies. This type of furnace pays for itself quickly through cost reduction. Manufacturers with diversified products require but one brazing furnace for their entire production. Three Sunbeam Stewart Electric Brazing furnaces, with capacities up to 500 lbs., are used in the parent Sunbeam plant — not only copper brazing assemblies, but also for silver soldering and bright annealing with equally good results. It may pay you to check the advantages of electric furnace brazing.

Sunbeam Mixmaster's entire base is a brazed assembly. Note the bright sheen of brazed surface.

This sprinkler base is bright annealed while the hose nozzle is silver soldered—all in this same furnace.

BOWATER'S OF CANADA

Interior view of one of the world's largest single integrated pulp and paper mills.

Bowater's Newfoundland Pulp and Paper Mills Limited is a great Canadian company, whose pride is in service.

Primarily Bowater's serves Canada. It does so by creating employment, by purchasing Canadian equipment and supplies (\$8,825,000 worth last year), by paying taxes, sustaining communities and particularly by doing its job of converting the annual yield of Canada's forests into paper, the paper that so vitally serves commerce and the cause of freedom.

But Bowater's also proudly serves the British Commonwealth, the United States and indeed all the nations of the Western world, since they all share in the benefits from Bowater's Canadian production.

The production of pulp and paper is Canada's largest manufacturing industry, and Bowater's Newfoundland Pulp

and Paper Mills Limited is an important unit in that industry.

Expansion at Bowater's marches right along with the remarkable expansion of the Canadian economy as a whole.

Over-all production last year at the company's mills at Corner Brook, Newfoundland, amounted to 346,600 tons—an increase of 106,000 tons since pre-war—and current improvements will soon further enlarge output.

Last year the company sold 305,342 tons of newsprint to buyers in the United States, in Great Britain and throughout the British Commonwealth.

Keeping pace with the expansion of the mills, the community of Corner Brook has grown from a small hamlet to a prosperous town possessing all the conveniences of an up-to-date city. Its population is now more than 18,000 of whom more than 2,300 are directly employed by Bowater's.

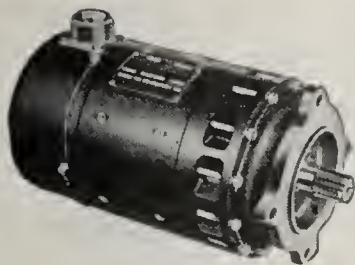

PULPWOOD ARRIVES AT CORNER BROOK

The diversity of Bowater's woods operations necessitates many methods of transportation for the pulpwood produced. Pictured above is one of these methods. Barges such as this, loaded with 2,000 cords of wood, and towed by ocean going tugs, bring wood to the mill from points up to 345 miles from Corner Brook.
